NC Clean Water Management Trust Fund Awards Grant to Town of Ramseur

RAMSEUR, NC – The Town of Ramseur is pleased to announce that the Board of Trustees of the North Carolina Clean Water Management Trust Fund (CWMTF) has awarded the Town of Ramseur a Greenway Planning Minigrant of up to \$35,000. The grant funds will be utilized to select, survey, and map a route for a greenway along Deep River; develop a site plan map; and identify property owners from whom land or trail easements would need to be acquired. The plan will focus on a greenway beginning near the U.S. Highway 64 bridge spanning Deep River and paralleling the river until it flows outside of the corporate limits to the south of Town.

The 1996 General Assembly of North Carolina established the CWMTF to help local governments, state agencies and conservation non-profit groups finance projects to protect and restore surface water quality. The Town of Ramseur is grateful for the partnership of the CWMTF in our efforts to protect the water quality in Deep River and to develop recreational opportunities and other benefits afforded by a greenway.
